What is XDC Network

▶ XDC is a hybrid blockchain platform that is built to modernize the global trade and finance sector through an accessible, efficient, and highly versatile decentralized infrastructure solution.

▶ XDC is designed to complement the legacy financial ecosystem by providing a permissioned blockchain that governments, enterprises and private firms can use to overhaul their tech stack and power a range of novel use cases.

▶ XDC is the coin of XDC network, and it will be used in our XDC Swap as a mediator, just like Ethereum ETH in Uniswap's AMM.

XDC Network Properties

▶ 2000 TPS

▶ Lowest fee

▶ Transaction confirmation: 2 sec

▶ Smart Contract: Yes

▶ Energy Consumption: Green

XSwap's Vision

- Giving many emerging projects under the XDC (XinFin) network the opportunity to enter the market directly after the completion of the development period.

- Connect all XRC20 tokens in our platform.

- Allowing swappers to swap and earn from XSP Ecosystem.

- Creation of an Android app (by our Developers) to facilitate easy use and navigation of our platform, and all other xdc dApps.

Staking & Farming

▶ **XSP** Staking will be launched in a secured pool , profits will be instant & stakers would be able to unstake at anytime .

▶ **Staking** will be launched between **Nov – Dec** depending on the development of our pools .

▶ Farming ecosystem will be live after the official launch of **XSP Swap**; Farming process is staking of Liquidity Providers tokens (LPs) in farming pools.

▶ **Farming** rewards would be taken by whosoever has the biggest balance during that period. Farming period is between a week to 3 weeks, it depends on the rewards to be earned.

▶ **Unfarm** to remove your liquidity.

▶ We put in **37%** of total supply into Staking & Farming rewards ecosystem.

Behind The Curtains

XSP project has full-time developers working tirelessly to ensure security in smart contracts & ecosystem platforms. They prefer to be anonymous like all other DEXs teams.

Confidence

Community's trust on this project came by auditing our smart contracts & platforms. XSwap smart contracts were forked & quoted from pancakeswap & uniswap.

NOTE

This project is under test mode, please take your own risks.
